

ALERT ID	SOURCE SYSTEM	ALERT TIME	ANALYST
CLD-0104	Sign-in logs (Entra ID)	2026-08-13 12:57:49	Eshak Basta

ALERT (WHAT FIRED, ON WHOM OR WHAT):

- Multiple MFA failures were detected for the user's account, followed by a successful sign-in from the same location.

HYPOTHESIS (BOTH DIRECTIONS):

- Malicious: An attacker attempted to bypass MFA and gain access to the account.
- Benign: The legitimate user entered incorrect MFA information before successfully authenticating.

EVIDENCE CHECKED:

- Entra ID sign-in logs showed that the failed MFA attempts and the successful authentication originated from the same IP address in Manchester. The activity matched the user's normal authentication pattern.

VERDICT:

True positive	False positive	Duplicate	Escalate	Insufficient data
---------------	----------------	-----------	----------	-------------------

SEVERITY:

- Informational
- The alert was initially reported as medium severity but was re-rated to informational because the activity was consistent with the user's normal behavior.

ACTION:

- Closed the alert and documented the activity as legitimate user behavior.

JUSTIFICATION:

- The sign-in location and IP address matched the user's established authentication history.

MITRE ATT&CK:

- None
