

ALERT ID	SOURCE SYSTEM	ALERT TIME	ANALYST
CLD-0103	Perimeter Firewall / IDS	2026-09-01 02:52:10 UTC	Eshak Basta

ALERT (WHAT FIRED, ON WHOM OR WHAT):

- The **TCP port sweep** rule fired after host **203.0.113.44 (LDN-SCAN-01)** probed more than 4,000 TCP ports across 180 internal hosts

HYPOTHESIS (BOTH DIRECTIONS):

- Malicious: an internal host is performing unauthorized reconnaissance.
- Benign: the activity is the organization's scheduled vulnerability scan.

EVIDENCE CHECKED:

- The shift handover documented **LDN-SCAN-01 (203.0.113.44)** as the authorized vulnerability scanner scheduled to run between **22:00 and 03:00 UTC**. The alert matched the same host, IP address, and time window

VERDICT:

True positive	False positive	Duplicate	Escalate	Insufficient data
---------------	----------------	-----------	----------	-------------------

SEVERITY:

- Informational
- The alert was initially reported as **Medium** but was reduced to **Informational** because the activity matched an approved and documented scan.

ACTION:

- Closed the alert and recommended creating a **scoped IDS exception** for approved scans during the scheduled maintenance window

JUSTIFICATION:

- The source IP, scan pattern, and time window matched the authorized vulnerability scanner.

MITRE ATT&CK:

- None
